Susan Cadwallader, Marketing  
Email: scadwallader@fullerton.edu  
Office: SGMH-5271  
Dr. Cadwallader’s research interests involve marketing education, non-profit marketing, implementation of strategies, and adoption of technology.

Barbara Cherry, Psychology  
Email: bcherry@fullerton.edu  
Office: H-735H  
Research interests include memory and attention, cognitive aging, chronic pain, inter-hemispheric collaboration in younger and older adults, and longitudinal change in cognition.

Barbra Erickson, Anthropology  
Email: beerickson@fullerton.edu  
Office: MH-426E  
Research interests include chronic illness, alternative therapies, cross-cultural comparison, and the impact of cultural beliefs and practices on aging.

Koren Fisher, Kinesiology  
Email: kofisher@fullerton.edu  
Office: KHS-226  
Research Interests: Dr. Fisher is primarily interested in physical activity and sedentary behavior and their relationships with health, chronic disease risk factors, and health services utilization in community-dwelling older adults. She is also interested in the short and long term effects of physical activity interventions, including those involving high intensity and functional training methods used in athletic populations, on cardio-metabolic risk factors, quality of life, and health services utilization in older adults.

Melanie Horn Mallers, Human Services  
Email: mhornmallers@fullerton.edu  
Office: EC-456  
Dr. Horn Mallers research interests include stress and health across the lifespan, parent-child relationship quality; aging and technology; aging and health behaviors, nursing home residents and evacuation, and advocacy and consumer protection.

Kristin Kleinjans, Economics  
Email: kkleinjans@fullerton.edu  
Office: SGMH-3349  
Dr. Kleinjans’ interests include health and inequality, labor economics, and the economics of education. She has studied the manner in which different health insurance systems affect retirement behavior. She has also studied reasons for gender differences in educational and occupational choices.
Edie Krampe, Sociology
Email: ekrampe@fullerton.edu     Office: CP-900-09     X4859
Dr. Krampe’s research topics include psychosocial antecedents and correlates of health and well-being in middle-aged and older women. Her research also addresses women’s childhood relationships with their fathers, along with the effects of this relationship on women’s well-being in later life.

Mary Read, Counseling
Email: mread@fullerton.edu     Office: EC-484     X2167
Research interest: commitment to feminist theory and qualitative methods, as I believe that sharing the power generated by research is essential for social justice, and that hearing the voices of real people's lives-as-lived is the most natural source of knowledge. I am interested in many aspects of identity/identification, including professional/career identity, LGBT issues, and aging with dignity. I am also involved in projects in the areas of service learning, women's health, and disability issues.

Debbie Rose, Kinesiology
Email: drose@fullerton.edu     Office: KHS-245     X5846
Dr. Rose conducts research in the area of motor control and learning, and balance and mobility disorders, in particular. Dr. Rose is nationally and internationally recognized for her work in the area of fall risk reduction programming.

Kathleen Wilson, Kinesiology
Email: kswilson@fullerton.edu     Office: KHS-220     X8329
Dr. Wilson’s research encompasses social influences for physical activity in youth and older adults. She has studied the use of health-related social control by parents after their children experience an activity lapse. Other topics of interest include social influences of groups, friends, family, and significant others (e.g., physicians), and theories of physical activity adherence and maintenance are areas of interest.

Karen Wong, Gerontology/Sociology
Email: kwong@fullerton.edu     Office: RGC-08     X4167
Professor Wong’s research interests include aging and dementia, health and Illness, intergenerational relationships, age-related vision loss, and elder abuse.
Laura Zettel-Watson, Psychology
Email: lzettel-watson@fullerton.edu   Office: H-710H    X3898
Dr. Zettel-Watson’s research in the field of Gerontological Health Psychology includes a longitudinal study of the cognitive, physical, and social impacts of chronic pain conditions on aging adults. In addition, she examines daily-level drinking behaviors among aging adults, and the potential uses of everyday technology for enhancing the health and well-being of older adults.
GERONTOLOGY PROGRAM AFFILIATED FACULTY: RESEARCH & CONTACT INFORMATION

David Cherin, Social Work
Email: dcherin@fullerton.edu  Office: EC-207K  X8481
Research interests include health care service delivery and child welfare. His work in health services focuses on service delivery systems in end-of-life care.

Kathryn Dickson, Biological Science
Email: kdickson@fullerton.edu  Office: DBH-116N  X5266
Research interests include locomotion and endothermy in fishes: comparative physiology and biochemistry.

John Doyle, Human Services
Email: jdoyle@fullerton.edu  Office: EC-474  X2254
Academic Interests and Research Areas: cultural diversity competence, professional ethics in the helping professions, issues of development and aging over the lifecycle, developmental disabilities, technology in human services education, and technology in human services delivery.

Karen Fazio, Health Sciences and Gerontology
Email: kfazio@fullerton.edu  Office: RGC-08  X4954
Karen Fazio's research interests include the impact of exercise on healthy aging, spirituality and the aging process, and family caregiver stress.

Barbara Haddad, Nursing
Email: bbhaddad@fullerton.edu  Office: EC-166  X2657
In general, my interest area is in health promotion, disease prevention with community dwelling >65 population

Sara Johnson, Anthropology
Email: sjohnson@fullerton.edu  Office: MH-426L  X5762
Research interest: Aging & the life course, societal transformation & the roles of the elderly.

Dennis Kao, Social Work
Email: dtkao@fullerton.edu  Office: EC-646  X2403
Research interests: Health care disparities, aging minority populations, and aging-friendly communities.
Sang June Oh, Engineering
Email: sjoh@fullerton.edu  Office: E-203  X2458
Research interests: control applications in biomedical engineering, assistive technology, and iterative learning and repetitive control design for aerospace applications.

Urvi Patel
Email: ujpatel@fullerton.edu  Office: RGC-08  X7057
My research explores how individual differences in brain connectivity may produce differences in information processing efficiency. Specifically, I am interested in how cognitive function may differ based on proficiency of higher-order cognition and how it may change as a function of age. Findings of this research can further our understanding of mechanisms of cognition in the normal and aging brain.

Nilay Patel, Biology
Email: npatel@fullerton.edu  Office: DBH-111A  X2483

Jennifer Piazza, Kinesiology and Health Sciences
Email: jpiazza@fullerton.edu  Office: KHS-243  X7137
Research interests: developmental and health psychology, psychophysiology, stressor reactivity, aging and emotional experience

Carter Rakovski, Sociology
Email: crakovski@fullerton.edu  Office: CP-900-20  X2737
Research interests include Caring Labor, Gender and Work, Nursing Homes, Health Care, Employment and Fibromyalgia.

Carl Renold, Human Services
Email: crenold@fullerton.edu  Office: EC-460  X5106

Dana Rutledge, Nursing
Email: drutledge@fullerton.edu  Office: EC-127A  X5743
Research interests include self-management of persons with chronic conditions, living with chronic pain (e.g., fibromyalgia), implementing change in practice.
James Santucci, Comparative Religion  
Email: jsantucci@fullerton.edu  
Office: UH-312  
Research interests: Theosophy, the Theosophical Society, Vedic literature, Theravada Buddhism, and Samkhya.

Eriko Self, Psychology  
Email: eself@fullerton.edu  
Office: H-810A  
Dr. Self studies visual perception and color vision. A current research topic is the comparison of visual search performance between younger and older adults.

Chandra Srinivasan, Chemistry  
Email: chandra@fullerton.edu  
Office: DBH-141  
Research interests include Manganese metabolism in the nematode Caenorhabditis elegans; investigating the molecular basis for the antioxidant-like activity exerted by ionic manganese using proteomics and functional genomics; use of microscopy for reactive oxygen species measurements; expression, purification and characterization of novel metal binding proteins.

Dominick Sturz, Health Science  
Email: dsturz@fullerton.edu  
Office: EC-475  
Professor Sturz’s research interests include various domains of gerontology (particularly aging workers), spirituality and religiosity (especially in aging), mental health, and education of diverse student populations.

Stephanie Vaughn, Nursing  
Email: svaughn@fullerton.edu  
Office: EC-194C  
Dr. Vaughn’s research interests include stroke prevention behaviors, management of stroke sequela in both men and women, and social presence in online learning environments.

Eileen Walsh, Sociology  
Email: ewalsh@fullerton.edu  
Office: CP-900-03  
Research interests include race, class, gender; multiracial families; Education inequalities.
